Skew:                          -0.114   Prob(JB):                      0.00367
Kurtosis:                       2.591   Cond. No.                         1.00
==============================================================================

Notes:
[1] R² is computed without centering (uncentered) since the model does not contain a constant.
[2] Standard Errors assume that the covariance matrix of the errors is correctly specified.
```
